WORKSHEET NO. 4

SESSION-(2020-2021)

CLASS- 2(A-F)

SUBJECT- ENVIRONMENTAL EDUCATION

LESSON-WATER FOR ALL

Instructions to the parents: As this worksheet is in continuation with the third worksheet (Water for All), it is expected that the child revises the previous worksheet of this lesson and then continues with the exercises in the worksheet.

Recap of the lesson:

- Animals and plants need water to live.
- We cannot live without water.
- Rain is the main source of water.
- We should never throw garbage into water.
- We should always drink clean water.
- We should never waste water.
- Some food items contain water.

Note: Parents are requested to make the child read, understand and learn the answers to the questions given below.

Exercise1: Answer the following questions in short.

Q1. Why is the water of ponds, lakes and rivers not fit for

drinking?

Ans. The water of ponds, lakes and rivers is not fit for drinking because it is not clean.

Q2. What happens when snow melts on the mountains?

Ans. When the snow melts on the mountains, water flows down into rivers and streams.

Q3. Name any five food items that contain water.

Ans. Five food items that contain water are
- watermelon, cucumber, orange, tomato,
milk.

Q4. Name any four sources of water.

Ans. Four sources of water are- rain, rivers, ponds and wells.

Exercise 2: Answer the following questions in detail:

Q1. Where do we get water from?

Ans. We get water from many sources like ponds, lakes, rivers and seas. We dig wells, tube wells and hand pumps to get underground water.

Q3. How can we keep the water bodies clean?

Ans. We can keep the water bodies clean by avoiding the following activities-

- throwing garbage into water bodies,
- washing clothes near water

bodies,

- bathing animals in water

bodies.

Q4. Where does the rainwater go?

Ans. Rain is the most important source of water. Some rainwater fills ponds, lakes and rivers and some rainwater seeps into the ground.

Instructions to the parents: Parents are requested to make the child do the exercises given below:

Exercise-3 : State True or

false

1) Plants do not need water to grow.

2) No one can live without water.

3) Water of ponds, lakes and rivers is clean.

4) Orange contains water.

5) We should always drink clean water.

Exercise 4: Choose the

correct word 1) All water

comes from.....

a) rain

b) hand pump

2) Rainwater collects in

..... .

a) ponds

b) taps

3) Water from..... is not clean.

a) tube wells

b) rivers

4) We should throw garbage in water.

a) never

b) always

5) We keep the tap open while brushing our teeth.

a) should

b) should not

Exercise 5: Draw and colour:

1) Any two sources of water.

2) Any two food items that contain water.

END
