

GIRLS' HIGH SCHOOL AND COLLEGE, PRAYAGRAJ.

SESSION- (2020-21)

WORKSHEET NO- 1

CLASS 2 (A-F)

SUBJECT - GENERAL KNOWLEDGE

CHAPTER- SEA ANIMALS

Instructions- Parents are expected to make the child read and understand the information given below.

Sea animals are animals that live in a body of saltwater like sea or ocean. Let's look at some of them.

- **Turtle- It is the most common species found in oceans. The life span of an average turtle is 80 years. It swims well with flippers.**

- **Sea Horse- The lifespan of a sea horse is 3 years. It is a tiny fish with a horse-like head. It is about 1 to 12 inches long.**

- **Eel- It is a small snake-like fish and has jaws, small sharp teeth and no ventral fins. It can grow between 4 inches to 11 inches long.**

- **Star Fish- It is a star-like fish that has five arms. If you cut off its arms, new arms will grow.**

- **Octopus- It is an animal with a rounded body, bulging eyes and eight long arms. Most of its body has no shell.**

- **Shark- Shark has a long, slim and a straight body which helps it to swim fast and to go deep inside the water.**
