Girls' High School & College, Prayagraj
Work Sheet No.6
Session - (2020 - 2021)
Class - 1 (A - F)
Subject - Mathematics
Topic - Subtraction 2-digit (simple)

Instruction - Parents should help the child to understand two digit simple subtraction sums and make them do the exercise given below.

Explanation –
 1 - In two digit subtraction, we always subtract or minus those numbers first that are written in ones place. After that we subtract numbers that are written in tens place.
 2 - Always remember -
  a) 0 - 0 = 0
  b) any number - 0 = the number itself

Example -

```
          a -  T   O          b -  T   O
               5   0               4   2
             - 4   0             - 1   0
              ----------          ----------
               1   0               3   2
              ----------          ----------
```

Exercise -

```
  a -   T   O          b-  T   O          c -  T   O
        3   6              2   2               1   6
      - 2   1            - 1   0             - 1   3
       ------------        -----------         -----------
       ------------        -----------         -----------
```

```
d -   T  O          e -  T  O          f - T  O
      4  9                2  6               2  9
    - 2  8              - 1  5             - 2  7
    ----------         ----------         ----------
    ----------         ----------         ----------

g -   T  O          h -  T  O          i - T  O
      5  8                3  8               4  8
    - 2  7              - 1  7             - 3  3
    ----------         ----------         ----------
    ----------         ----------         ----------

j -   T  O          k -  T  O          l - T  O
      5  9                6  8               7  5
    - 3  4              - 4  4             - 5  2
    -----------        -----------        ----------
    -----------        -----------        ----------
```

END
